- Minimum Order Quantity: 2000Pcs
- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Usage: Painting
- Ferrule Material: Aluminum
- Type: Brush
- Size: Medium
- Handle Color: Natural
- Bristle Length: Short
- Ferrule Color: Silver
- Brush Head: Hollow Polyester Filament
- Highlight: **natural handle synthetic filament brush, wood plastic cleaning brush, synthetic filament brush for cleaning**

Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet a wide range of cleaning and scrubbing needs. Crafted with precision and care, this medium-sized brush offers an ideal balance between maneuverability and coverage, making it suitable for both detailed work and broader surface cleaning. Whether you are tackling stubborn grime or performing routine maintenance, this brush ensures effective results every time.

At the core of this brush's exceptional performance is its durable synthetic bristle construction. The white synthetic fibers are carefully selected to provide optimal stiffness and resilience, allowing the brush to maintain its shape and effectiveness even after prolonged use. This makes the Synthetic Fiber Scrubbing Brush an excellent choice for various applications, from household cleaning tasks to industrial scrubbing jobs. Its synthetic bristles are resistant to wear and tear, ensuring long-lasting durability and consistent performance.

The brush features a medium size, which is perfect for a broad spectrum of cleaning activities. It is large enough to cover substantial surface areas efficiently, yet compact enough to reach into tighter spaces and corners. This size versatility makes the brush an indispensable tool in any cleaning arsenal, whether you are dealing with kitchen appliances, automotive parts, or workshop equipment. One of the standout features of this brush is its aluminum ferrule. The ferrule is crimped securely to the handle, providing a robust connection that prevents bristle shedding and enhances the overall durability of the brush. Aluminum, being lightweight yet strong, adds to the brush's ease of use and longevity. The crimped ferrule design not only ensures the bristles stay firmly in place but also contributes to the brush's professional appearance and structural integrity.

The white bristle color is not just aesthetically pleasing but also functional. It allows users to easily see dirt and debris buildup during cleaning, making it simpler to gauge when the brush needs rinsing or replacement. This visual cue is particularly useful in environments where hygiene and cleanliness are paramount, such as kitchens, laboratories, and healthcare facilities.

As a durable synthetic bristle brush, this product is engineered to withstand various chemicals and cleaning agents without degrading. Unlike natural bristles, synthetic fibers do not absorb moisture or odors, which helps maintain the brush's cleanliness and prevents bacterial growth. This property makes the Synthetic Fiber Scrubbing Brush a hygienic and low-maintenance option for both personal and professional use.

Additionally, the brush's synthetic bristles provide excellent scrubbing power without damaging surfaces. They are stiff enough to remove tough stains and grime but gentle enough to use on delicate materials. This versatility makes the brush a preferred choice for many users who require a balance between effectiveness and surface protection.

In summary, the Synthetic Filament Brush is a medium-sized, durable tool featuring a crimped aluminum ferrule and white synthetic bristles. Its design and materials combine to deliver a high-performance synthetic fiber scrubbing brush that excels in durability, versatility, and hygiene. Whether for household chores, automotive detailing, or professional cleaning, this durable synthetic bristle brush offers exceptional value and dependable performance, making it a must-have in any cleaning toolkit.

Features:

Durable Synthetic Bristle Brush made with high-quality synthetic filament

Multi-Purpose Filament Brush suitable for various cleaning and painting tasks

Filament Bristle Scrubbing Brush designed for effective and thorough scrubbing

Medium size for versatile use and easy handling

Natural-colored handle for a comfortable and classic grip

Silver crimped ferrule ensures secure bristle attachment and durability

Applications:

The OEM Synthetic Filament Brush is a versatile and reliable Multi-Purpose Filament Brush designed to meet a wide range of cleaning and painting needs. Originating from China, this high-quality brush combines durability and efficiency, making it an essential tool for both professional and personal use. With a handle made from sturdy wood or plastic and a natural handle color, this brush offers a comfortable grip for extended use. The silver aluminum ferrule securely holds the synthetic filament bristles, ensuring long-lasting performance and resistance to wear.

This Multi-Purpose Filament Brush is perfect for various application occasions and scenarios. Whether you are involved in home improvement projects, automotive detailing, or industrial cleaning, this Filament Brush Cleaning Tool delivers exceptional results. It is ideal for cleaning intricate surfaces, applying paint or varnish, and scrubbing hard-to-reach areas. The synthetic filament bristles are designed to withstand different substances, from paint and adhesives to dirt and grease, making this brush a must-have for any workshop or household toolkit.

In the realm of painting and decorating, the OEM Synthetic Filament Brush excels in providing smooth and even coverage on multiple surfaces, including wood, metal, and plastic. Its adaptability makes it suitable for artists, craftsmen, and DIY enthusiasts who require precision and control. Additionally, its robust construction ensures it maintains shape and effectiveness even after repeated use, which is crucial for professional settings that demand consistent quality.

When it comes to packaging and logistics, the product comes in standard export cartons, ensuring safe and secure delivery. The minimum order quantity is set at 2000 pieces, with a competitive price range of USD 0.50 to 5.00 per piece, catering to bulk buyers and distributors. OEM offers a supply ability of 2500 pieces per week, with a delivery time of 30 working days. Payment terms are flexible with T/T accepted, streamlining the purchasing process.

Overall, the OEM Synthetic Filament Brush stands out as a dependable Filament Brush Cleaning Tool suitable for a multitude of tasks. Its combination of quality materials, ergonomic design, and efficient supply chain makes it an excellent choice for those seeking a cost-effective yet high-performance Multi-Purpose Filament Brush for diverse application occasions and scenarios.

Customization:

Our Durable Synthetic Bristle Brush offers exceptional customization services to meet your specific needs. As an OEM brand based in China, we provide high-quality brushes with a minimum order quantity of 2000 pieces, ensuring efficient production and supply. Each Durable Synthetic Bristle Brush features a natural handle available in wood or plastic materials, combined with short synthetic bristles designed for durability and performance. The medium size brush is ideal for various applications, delivering consistent quality

every time.

We package all brushes in standard export cartons and maintain a supply ability of 2500 pieces per week. Pricing ranges from USD 0.50 to 5.00 per piece, with flexible payment terms via T/T. Our typical delivery time is 30 working days, ensuring timely fulfillment of your orders for the Durable Synthetic Bristle Brush.
