- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Ferrule Material: Aluminum
- Handle Material: Wood/Plastic
- Type: Brush
- Brush Head: Hollow Polyester Filament
- Ferrule Type: Crimped
- Ferrule Color: Silver
- Bristle Material: Synthetic
- Size: Medium
- Highlight: **white filament scrubbing brush, short bristle scrubbing brush, hard surface dirt removal brush**

Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet a wide range of cleaning and scrubbing needs. Featuring a brush head made from hollow polyester filament, this brush offers exceptional durability and performance. The hollow nature of the polyester filaments ensures that the bristles are both resilient and flexible, allowing for effective scrubbing without damaging surfaces. This makes the brush ideal for various applications, whether it is for household cleaning, industrial use, or craft projects.

One of the standout features of this brush is its durable synthetic bristle brush design. The synthetic materials used in the bristles are engineered to withstand rigorous use over time, resisting wear and tear much better than natural bristles. The white bristle color not only provides a clean and professional look but also allows users to easily see any dirt or debris collected during cleaning, ensuring thorough results every time. These filaments maintain their shape and stiffness, providing consistent performance across diverse surfaces. The handle of the Synthetic Filament Brush is thoughtfully crafted from high-quality wood or plastic, catering to different preferences and uses. The wooden handle option offers a natural, ergonomic grip that fits comfortably in the hand, reducing fatigue during extended use. It also adds an eco-friendly element to the brush's design, appealing to environmentally conscious consumers. Alternatively, the plastic handle provides a lightweight and moisture-resistant option, making it perfect for wet environments or situations where easy cleaning of the handle itself is necessary. Both handle types come in a natural color, which complements the overall aesthetic of the brush while maintaining a simple and practical appearance.

Securing the bristles firmly in place is a crimped ferrule, which enhances the brush's durability and longevity. The crimped ferrule design tightly holds the hollow polyester filament bristles, preventing them from shedding or loosening during use. This feature is particularly important for users who rely on the brush for heavy-duty scrubbing tasks, as it ensures that the brush remains intact and functional even after prolonged use. The combination of a sturdy ferrule with resilient synthetic bristles makes this brush a dependable tool for many cleaning challenges.

As a multi-purpose filament brush, this product excels in a variety of environments and applications. Whether you need to scrub pots and pans in the kitchen, clean work surfaces in a workshop, or even apply paint or adhesives in an art project, this brush delivers reliable performance. Its synthetic bristles are tough enough to tackle grime and dirt but gentle enough to protect delicate surfaces from scratches. This versatility makes the Synthetic Filament Brush an essential addition to any cleaning or crafting toolkit.

In summary, the Synthetic Filament Brush combines the strength and resilience of a durable synthetic bristle brush with the practicality of a filament bristle scrubbing brush, all housed in a thoughtfully designed handle made from wood or plastic. Its hollow polyester filament bristles, white in color, ensure effective cleaning while maintaining flexibility and durability. The crimped ferrule securely holds the bristles in place, preventing shedding and enhancing the brush's lifespan. With its natural-colored handle and multi-purpose functionality, this filament brush is an excellent choice for anyone seeking a dependable and versatile cleaning tool.

Features:

- Product Name: Synthetic Filament Brush
- Handle Material: Wood or Plastic for comfortable grip
- Type: Brush, ideal for various cleaning tasks
- Brush Head: Hollow Polyester Filament for effective cleaning
- Bristle Material: Durable Synthetic bristles
- Bristle Length: Short bristles for precise cleaning
- Perfect Filament Brush Cleaning Tool for detailed and thorough cleaning
- Lightweight and easy to use Filament Brush Cleaning Tool
- Versatile Filament Brush Cleaning Tool suitable for multiple surfaces

Applications:

The OEM Synthetic Filament Brush is a versatile cleaning tool designed to meet various scrubbing and cleaning needs. Manufactured in China, this brush features high-quality synthetic fiber bristles that provide effective and durable scrubbing power. With a medium size and short white filament bristles, the brush is ideal for tackling stubborn dirt and grime on a variety of surfaces without causing damage. The natural-colored handle offers a comfortable grip, making it easy to use for extended periods.

This Synthetic Fiber Scrubbing Brush is perfect for household cleaning occasions such as kitchen counters, sinks, bathroom tiles, and grout lines. Its filament bristles are tough enough to remove dirt and stains yet gentle enough for delicate surfaces. It is also widely used in commercial environments like restaurants, hotels, and cleaning services where efficient and reliable scrubbing tools are essential for maintaining hygiene standards.

In industrial and workshop settings, the Filament Bristle Scrubbing Brush proves to be an indispensable tool for cleaning machinery parts, tools, and workbenches. The synthetic filament cleaning brush efficiently removes grease, oil, and debris, helping to keep equipment in optimal working condition. Its durability and ergonomic design make it suitable for repetitive use in demanding environments.

OEM offers this synthetic filament brush with a minimum order quantity of 2000 pieces, priced between USD 0.50 to 5.00 per piece, making it an economical choice for bulk purchasing. The brushes are packaged in standard export cartons to ensure safe delivery. With a supply ability of 2500 pieces per week and a delivery time of 30 working days, OEM guarantees timely fulfillment of orders. Payment terms accepted are T/T, facilitating smooth and secure transactions.

Whether you need a reliable cleaning brush for home, commercial, or industrial use, the OEM Synthetic Filament Cleaning Brush with its synthetic fiber bristles and practical design is an excellent solution. Its combination of durability, efficiency, and affordability makes it a preferred choice for various scrubbing applications.

Customization:
