Basic Information

- Place of Origin: China
- Brand Name: OEM
- Minimum Order Quantity: 2000Pcs
- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Bristle Material: Synthetic
- Handle Material: Wood/Plastic
- Type: Brush
- Brush Head: Hollow Polyester Filament
- Size: Medium
- Handle Color: Natural
- Bristle Length: Short
- Material: Synthetic Filament
- Highlight: **Hollow polyester filament brush, Synthetic filament cleaning tool, Industrial durable filament brush**

Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet a wide range of cleaning and painting needs. Crafted with high-quality synthetic filaments, this brush offers exceptional durability and performance, making it an essential addition to any toolkit or workspace. Whether you are a professional artist, a DIY enthusiast, or someone who requires a dependable cleaning brush, the Synthetic Filament Cleaning Brush is engineered to deliver outstanding results every time.

One of the standout features of this brush is its handle, which is available in both wood and plastic options. The wooden handle provides a classic, sturdy grip that is comfortable to hold for extended periods, making it ideal for detailed work and precision tasks. On the other hand, the plastic handle version offers a lightweight and ergonomic design that is easy to clean and resistant to moisture, ensuring longevity and ease of use in various environments. Both handle types are thoughtfully designed to provide excellent control, reducing hand fatigue during prolonged use.

The brush's ferrule is made from high-quality aluminum, known for its lightweight and corrosion-resistant properties. This ensures that the ferrule maintains its integrity even after repeated exposure to water, solvents, or cleaning agents. The ferrule is crimped securely to the handle, providing a solid connection that prevents bristle loss and enhances the overall durability of the brush. Finished in a sleek silver color, the ferrule not only adds to the brush's aesthetic appeal but also signifies its robust construction and premium quality.

At the heart of this brush is its synthetic filament bristles. Unlike natural bristles, synthetic filaments are engineered to be more resilient and versatile, making the Synthetic Filament Cleaning Brush suitable for a variety of surfaces and applications. The filaments are designed to maintain their shape and stiffness over time, allowing for consistent performance whether you are cleaning delicate electronics, applying paint, or scrubbing stubborn dirt. Furthermore, synthetic filaments are resistant to damage from chemicals and solvents, which enhances the brush's lifespan and effectiveness.

This Multi-Purpose Filament Brush is adaptable to numerous tasks, ranging from household cleaning to industrial applications. Its synthetic filament construction ensures it can handle wet or dry cleaning tasks without deteriorating, while the ergonomic handle and sturdy ferrule provide the comfort and durability needed for extended use. Whether you need to clean intricate machinery, apply coatings, or perform detailed artistic work, this brush offers the precision and control necessary to achieve professional results.

The combination of a wooden or plastic handle, a crimped aluminum ferrule, and premium synthetic filaments makes the Synthetic Filament Cleaning Brush a dependable choice for users across different industries. Its design addresses common issues such as bristle shedding, handle discomfort, and ferrule corrosion, ensuring that every brush performs consistently and lasts longer. With this brush in your collection, you can expect a tool that adapts to your needs and stands up to rigorous use.

In summary, the Synthetic Filament Brush is a high-quality, durable, and multi-functional tool that excels in various cleaning and painting applications. Its synthetic filament bristles provide superior performance and longevity, while the choice of wood or plastic handles caters to user preferences and specific task requirements. The crimped aluminum ferrule in a stylish silver finish ensures structural integrity and resistance to wear. This Multi-Purpose Filament Brush is designed to deliver exceptional value and reliability, making it a smart investment for professionals and hobbyists alike.

Features:

- Product Name: Synthetic Filament Brush
- Bristle Length: Short for precise application
- Usage: Ideal for painting tasks
- Ferrule Type: Crimped for secure bristle attachment
- Material: Durable synthetic filament
- Bristle Material: High-quality synthetic fibers
- Functions as a Synthetic Filament Cleaning Brush for easy maintenance
- Works effectively as a Synthetic Fiber Scrubbing Brush
- Serves as a reliable Filament Brush Cleaning Tool

Applications:

The OEM Synthetic Filament Brush is a versatile and reliable tool designed for a wide range of painting and cleaning applications. Originating from China, this high-quality brush is ideal for both professional painters and DIY enthusiasts who require precision and durability. With a minimum order quantity of 2000 pieces and a supply ability of 2500 pieces per week, it caters to bulk buyers looking for consistent quality at an affordable price range of USD 0.50 to 5.00 per piece.

This Durable Synthetic Bristle Brush features white synthetic fibers that provide excellent paint absorption and smooth application, making it an indispensable Synthetic Fiber Brush Tool in various painting tasks. The aluminum ferrule ensures a sturdy connection between the handle and bristles, enhancing the brush's overall durability and longevity. Whether you are working on interior walls, furniture, or intricate craft projects, this filament brush cleaning tool delivers precise results with minimal shedding.

Packaging is handled with care, using standard export cartons to guarantee safe delivery. The OEM Synthetic Filament Brush is shipped with a delivery time of approximately 30 working days after payment, which is typically processed via T/T terms. This efficient supply chain setup ensures that customers receive their orders promptly to keep their projects on schedule.

In terms of application occasions and scenarios, this brush excels in household painting, commercial and industrial coating tasks, as well as artistic endeavors. It is particularly useful for cleaning tools and surfaces where synthetic bristles help remove paint residues and debris without damaging delicate surfaces. The filament brush cleaning tool aspect emphasizes its dual functionality—not only as a painting brush but also as an effective cleaning instrument for maintaining other painting equipment.

Overall, the OEM Synthetic Filament Brush is a highly functional and economical solution for anyone in need of a synthetic fiber brush tool that balances quality, durability, and cost-effectiveness. Its adaptability to various painting and cleaning scenarios makes it a must-have in workshops, construction sites, art studios, and homes alike.

Customization:

Our Synthetic Filament Brush offers exceptional customization services to meet your specific needs. As an OEM brand based in China,

we provide high-quality Multi-Purpose Filament Brushes designed for various painting and cleaning applications. With a minimum order quantity of 2000 pieces, we ensure competitive pricing ranging from USD 0.50 to 5.00 per piece.

Each brush features a durable aluminum ferrule and a hollow polyester filament brush head, crafted from premium synthetic bristle material. This combination guarantees excellent performance and longevity, making it an ideal Synthetic Fiber Brush Tool for both professional and everyday use.

We package all products in standard export cartons to ensure safe delivery, with a supply ability of 2500 pieces per week. Our typical delivery time is 30 working days, and we accept payments via T/T for your convenience.

Whether you require Synthetic Filament Cleaning Brushes for industrial purposes or Multi-Purpose Filament Brushes for general painting tasks, our customization services are tailored to provide the perfect solution that fits your requirements.
