- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Type: Brush
- Handle Material: Wood/Plastic
- Ferrule Type: Crimped
- Handle Color: Natural
- Ferrule Material: Aluminum
- Size: Medium
- Material: Synthetic Filament
- Bristle Material: Synthetic
- Highlight: **aluminum ferrule synthetic filament brush, white bristle industrial cleaning brush, medium size precision task brush**

Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed for a wide range of painting applications. Featuring a medium size, this brush offers the perfect balance between precision and coverage, making it an ideal choice for both professional artists and DIY enthusiasts. Whether you're working on detailed artwork or larger surface areas, this brush provides excellent control and smooth application, ensuring a flawless finish every time.

At the heart of this brush's performance is its durable synthetic bristle brush construction. The synthetic fibers are carefully engineered to mimic the qualities of natural bristles while offering enhanced durability and resistance to wear and tear. Unlike natural bristles, these synthetic fibers do not absorb water or paint, allowing for easier cleaning and longer-lasting use. This makes the brush an excellent choice for use with a variety of paints, including acrylics, oils, and watercolors.

One of the standout features of this multi-purpose filament brush is its crimped ferrule type. The ferrule securely holds the bristles in place, preventing shedding and maintaining the brush's shape even after repeated use. The crimped design not only ensures durability but also adds to the overall stability and balance of the brush, making it comfortable to hold and maneuver during extended painting sessions.

The handle of the Synthetic Filament Brush is available in both wood and plastic options, catering to different user preferences. The wooden handle offers a classic, sturdy feel with a natural grip that many artists appreciate. On the other hand, the plastic handle provides a lightweight and moisture-resistant alternative, ideal for those who prefer a modern and easy-to-clean tool. Both handle types are ergonomically designed to reduce hand fatigue and provide maximum control for precise brush strokes.

This synthetic fiber brush tool excels in versatility, making it suitable for a variety of painting techniques and surfaces. Whether you are applying smooth layers of paint, creating textured effects, or working on intricate designs, this brush adapts effortlessly to your needs. Its medium size allows for detailed work without sacrificing the ability to cover larger areas efficiently, making it a valuable addition to any artist's toolkit.

In addition to its technical qualities, the Synthetic Filament Brush is designed with durability in mind. The combination of high-quality synthetic bristles, a crimped ferrule, and a sturdy handle ensures that this brush maintains its performance over time. It resists deformation, bristle loss, and handle damage, providing consistent results even with frequent use.

Whether you are a professional painter, hobbyist, or craftsperson, this brush offers a reliable and efficient solution for your painting needs. Its multi-purpose design means it can be used for a variety of mediums and projects, from fine art paintings and decorative crafts to home improvement tasks. The brush's synthetic fibers are particularly advantageous for users seeking a cruelty-free alternative to natural bristle brushes without compromising on quality or performance.

In summary, the Synthetic Filament Brush is an exceptional painting tool that combines durability, versatility, and comfort. Its medium size makes it adaptable to many applications, while the durable synthetic bristle brush construction ensures long-lasting use. The crimped ferrule provides stability and prevents bristle loss, and the choice between wood and plastic handles offers personalized comfort. As a multi-purpose filament brush, it stands out as a synthetic fiber brush tool that meets the demands of both amateur and professional painters alike.

Features:

Product Name: Synthetic Filament Brush

Bristle Material: Synthetic fibers for durability and effective cleaning

Size: Medium, suitable for a variety of tasks

Ferrule Type: Crimped ferrule for secure bristle attachment

Ferrule Color: Stylish silver finish

Type: Brush designed for versatile use

Ideal Synthetic Filament Cleaning Brush for detailed and general cleaning tasks

Durable Synthetic Fiber Brush Tool suitable for multiple surfaces

Multi-Purpose Filament Brush perfect for crafts, cleaning, and other applications

Applications:

The OEM Synthetic Filament Brush is an ideal cleaning tool designed for a wide range of applications and occasions. Manufactured in China, this high-quality Filament Brush Cleaning Tool features synthetic fiber bristles that provide excellent durability and effective scrubbing power. Whether you need a reliable brush for household chores, commercial cleaning, or industrial use, this Synthetic Fiber Scrubbing Brush is built to meet your needs with precision and efficiency.

This Filament Bristle Scrubbing Brush is perfect for daily cleaning tasks such as scrubbing kitchen surfaces, cleaning bathroom tiles, and removing stubborn dirt from floors. Its short synthetic bristles are designed to deliver thorough cleaning without damaging delicate surfaces, making it an essential tool for both residential and professional environments. The aluminum ferrule with a sleek silver color adds durability and aesthetic appeal, while the comfortable wood or plastic handle ensures ease of use during extended cleaning sessions.

In commercial settings such as restaurants, hotels, and janitorial services, the Synthetic Filament Brush proves invaluable for maintaining hygiene and cleanliness. It can efficiently tackle grease, grime, and other tough residues on various surfaces, helping staff keep facilities spotless. Additionally, its robust construction and high supply ability—2500 pieces per week—make it an excellent choice for bulk purchases, supported by a minimum order quantity of 2000 pieces.

For industries requiring heavy-duty cleaning tools, this brush's synthetic filament bristles resist wear and tear, providing long-lasting performance even under rigorous use. The brush's packaging in standard export cartons ensures safe delivery, with a delivery time of approximately 30 working days. Payment terms are flexible with T/T accepted, and pricing ranges from USD 0.50 to 5.00 per piece, offering cost-effective solutions without compromising quality.

In summary, the OEM Synthetic Filament Brush is a versatile, durable, and efficient filament brush cleaning tool suitable for various cleaning occasions. Its synthetic fiber scrubbing brush design, combined with quality materials such as aluminum ferrule and wood or plastic handles, makes it a preferred choice for both everyday users and professionals seeking reliable cleaning performance.

Customization:

Our OEM Multi-Purpose Filament Brush offers exceptional customization services to meet your specific needs. Originating from China, this Synthetic Fiber Brush Tool is available with a minimum order quantity of 2000 pieces, ensuring scalability for your projects. Priced competitively between USD 0.50 and 5.00 per piece, it provides excellent value without compromising quality.

The brush features a medium size with white synthetic bristles, ideal for various applications. The ferrule is made from durable aluminum with a crimped design, securely holding the bristles in place. Customers can choose between wood or plastic handles to suit their preferences and ergonomic requirements.

We package each Synthetic Fiber Brush Tool in standard export cartons to guarantee safe delivery. With a supply ability of 2500 pieces per week and a delivery time of approximately 30 working days, we ensure timely fulfillment of your orders. Payment terms are flexible with T/T accepted.

Whether you need a versatile Multi-Purpose Filament Brush for industrial use or specialized tasks, our customization services cater to your demands with high-quality materials and reliable production capacity.
