### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Minimum Order Quantity: 2000Pcs
- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

### Product Specification

- Brush Head: Hollow Polyester Filament
- Ferrule Type: Crimped
- Bristle Material: Synthetic
- Bristle Color: White
- Handle Material: Wood/Plastic
- Type: Brush
- Size: Medium
- Usage: Painting
- Highlight: **synthetic filament cleaning brush, hollow polyester brush head, filament brush cleaning tool**

### Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet a wide range of painting and crafting needs. Featuring a carefully engineered combination of materials, this brush offers exceptional performance and durability, making it an ideal choice for both professionals and hobbyists alike. With its thoughtfully designed components, the Multi-Purpose Filament Brush ensures smooth application, precise control, and long-lasting use.

One of the standout features of this brush is its handle, which is available in either wood or plastic. The wooden handle option provides a classic, sturdy grip that feels natural in the hand, offering excellent balance and comfort during extended use. Alternatively, the plastic handle version is lightweight and resistant to moisture, making it a practical choice for those who prefer a modern, easy-to-clean tool. Both handle materials are crafted to withstand daily wear and tear, contributing to the overall durability of the brush.

The ferrule, which connects the bristles to the handle, is finished in a sleek silver color. This not only adds a touch of elegance to the brush's appearance but also ensures a secure fit that prevents bristle shedding and maintains structural integrity. The silver ferrule is made from high-quality metal, resistant to rust and corrosion, further enhancing the longevity of the brush.

At the heart of this brush's functionality are its bristles. The Synthetic Filament Brush is equipped with short, white synthetic bristles that are meticulously crafted to deliver consistent performance. The short length of the bristles provides excellent control and precision, making it easier to apply paint evenly, reach tight corners, and create detailed work. The white color of the bristles allows users to easily monitor paint coverage and cleanliness during use, ensuring optimal application every time.

Made from durable synthetic materials, the bristles are designed to resist wear, maintain their shape, and provide a smooth finish across various surfaces. Unlike natural hair brushes, the synthetic fibers are less prone to absorbing water and paint, which means they dry faster and are easier to clean. This makes the Durable Synthetic Bristle Brush a practical and cost-effective option for repeated use in different projects without sacrificing quality.

As a Multi-Purpose Filament Brush, this product excels in versatility. It is suitable for a wide range of applications including acrylic, oil, and watercolor painting, as well as for use in crafts, model making, and even household touch-up tasks. Its adaptability makes it an indispensable tool in any artist's or DIY enthusiast's toolkit. Whether you are applying fine details or covering larger areas, this brush provides the reliability and performance needed to achieve professional results.

In summary, the Synthetic Filament Brush combines a sturdy wood or plastic handle, a stylish and secure silver ferrule, and short, white synthetic bristles to create a high-quality, multi-purpose tool. Its durable synthetic bristles offer long-lasting performance, while the ergonomic handle options ensure comfort during use. Perfectly suited for a variety of painting and crafting projects, this Multi-Purpose Filament Brush is a must-have for anyone seeking a dependable, efficient, and easy-to-maintain brush that delivers excellent results every time.

### Features:

Product Name: Synthetic Filament Brush

Material: High-quality Synthetic Filament for durability and effective cleaning

Size: Medium, ideal for versatile painting tasks

Handle Material: Available in Wood or Plastic for comfortable grip

Ferrule Color: Sleek Silver finish for a professional look

Usage: Perfect for painting applications, providing smooth and precise strokes

Multi-purpose: Functions as a Synthetic Filament Cleaning Brush and Synthetic Fiber Scrubbing Brush

Efficient Filament Brush Cleaning Tool for maintaining brush quality and longevity

### Applications:

The OEM Synthetic Filament Brush is an exceptionally versatile cleaning tool designed to meet various application occasions and scenarios. Originating from China, this brush features durable synthetic bristles that ensure long-lasting performance and effective cleaning. With a natural-colored handle and short white bristles, it offers both aesthetic appeal and practical functionality. Ideal for both industrial and domestic use, this filament brush cleaning tool is perfect for tackling tough dirt, grime, and debris in numerous environments.

In household settings, the Durable Synthetic Bristle Brush excels in cleaning kitchen appliances, countertops, sinks, and bathroom surfaces. Its short bristles provide thorough scrubbing power to remove stubborn stains without damaging delicate surfaces. The ergonomic natural handle ensures comfortable use during extended cleaning sessions. Whether you're scrubbing tiles, grout, or even outdoor furniture, this filament brush cleaning tool makes the job easier and more efficient.

For commercial and industrial applications, the OEM Synthetic Filament Brush is an indispensable tool. It is widely used in workshops, factories, and maintenance departments for cleaning machinery, tools, and workbenches. The brush's synthetic bristles resist wear and maintain their shape, making them suitable for heavy-duty cleaning tasks. Additionally, the brush is effective in automotive detailing, helping to clean engines, tires, and intricate parts where precision and durability are crucial.

This brush is also highly valued in healthcare and food processing environments thanks to its hygienic synthetic bristles that can be easily sanitized. The filament brush cleaning tool can be used to clean medical instruments, food preparation areas, and equipment to maintain high standards of cleanliness and safety.

OEM offers this Durable Synthetic Bristle Brush with a minimum order quantity of 2000 pieces, priced competitively between USD 0.50 and 5.00 per piece depending on specifications. Each brush is packaged in a standard export carton to ensure safe delivery. With a supply ability of 2500 pieces per week and a delivery time of approximately 30 working days, OEM guarantees reliable and timely fulfillment. Payment terms are flexible with T/T options available for ease of transaction.

In summary, the OEM Synthetic Filament Brush is a practical, durable, and efficient cleaning tool suitable for a wide array of applications. Its synthetic bristles, natural handle, and robust design make it an ideal choice for anyone seeking a reliable filament brush cleaning tool for both everyday and specialized cleaning needs.

### Customization:

Our Synthetic Filament Brush product offers customizable options to meet your specific needs. As an OEM brand based in China, we provide high-quality Filament Bristle Scrubbing Brushes with a minimum order quantity of 2000 pieces. The brush features a hollow polyester filament brush head and synthetic bristle material, ensuring durability and effective cleaning performance. The handle color is natural, complementing the synthetic filament construction for a reliable Synthetic Fiber Brush Tool ideal for various painting applications. We package each order in standard export cartons to ensure safe delivery. Our supply ability is 2500 pieces per week, with a delivery time of approximately 30 to 40 days. Pricing ranges from USD 0.50 to 5.00 per piece, depending on customization and order volume. Payment terms are T/T for your convenience. This Filament Brush Cleaning Tool is perfect for both professional and personal use, providing excellent performance in scrubbing and painting tasks. Contact us to customize your order and experience the quality and service we offer.
