Basic Information

- Place of Origin: China
- Brand Name: OEM
- Minimum Order Quantity: 2000Pcs
- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Ferrule Material: Aluminum
- Bristle Length: Short
- Brush Head: Hollow Polyester Filament
- Ferrule Color: Silver
- Bristle Material: Synthetic
- Usage: Painting
- Type: Brush
- Bristle Color: White
- Highlight: **synthetic filament paint brush,
hollow polyester filament brush,
white bristle paint brush**

Product Description:

The Synthetic Filament Brush is an exceptional cleaning tool designed to deliver superior performance and durability for a wide variety of scrubbing and cleaning tasks. Featuring a medium size, this brush strikes the perfect balance between maneuverability and coverage, making it an ideal choice for both detailed work and larger surface areas. Its synthetic filament bristles are engineered to provide effective scrubbing power without causing damage, ensuring a thorough clean on delicate and robust surfaces alike.

One of the standout features of this brush is its high-quality synthetic filament bristles. The bristle color is a crisp white, which not only gives the brush a clean and professional appearance but also allows users to easily monitor dirt buildup during use. These synthetic fibers are specifically designed to maintain their shape and stiffness over time, offering consistent performance without fraying or shedding. This durability makes the Synthetic Fiber Brush Tool an excellent investment for both domestic and commercial cleaning applications.

The brush head is crafted from hollow polyester filament, which enhances the brush's ability to trap and lift dirt, grime, and debris effectively. The hollow construction of the polyester filaments increases flexibility and resilience, allowing the bristles to reach into crevices and uneven surfaces with ease. This design feature significantly improves the efficiency of the Filament Bristle Scrubbing Brush, ensuring that every cleaning task is executed thoroughly and effortlessly.

Complementing the synthetic bristles is a sturdy silver ferrule that securely holds the bristles in place. The ferrule's silver color adds a touch of elegance and professionalism to the brush's overall aesthetic. More importantly, the ferrule is constructed from durable materials that resist corrosion and wear, providing long-lasting stability and support to the brush head. This robust ferrule ensures that the brush maintains its structural integrity even after repeated heavy-duty use.

The medium size of this Synthetic Filament Cleaning Brush makes it versatile enough for a variety of applications, from scrubbing kitchen countertops and bathroom tiles to cleaning outdoor furniture and automotive surfaces. Its ergonomic design allows for comfortable handling, reducing hand fatigue during extended cleaning sessions. Whether you are a professional cleaner or a homeowner looking for an efficient scrubbing tool, this brush meets the demands of rigorous cleaning while being gentle enough for sensitive surfaces.

In addition to its practical features, the Synthetic Filament Brush is easy to maintain. The synthetic fibers dry quickly after use, preventing the growth of mold and mildew. This quick-drying property also means the brush is ready for reuse in a short amount of time, enhancing productivity. Cleaning the brush itself is straightforward—simply rinse it under running water to remove residue and debris, and it will be ready for the next cleaning task.

Overall, the Synthetic Fiber Brush Tool is a reliable and effective cleaning accessory that combines modern materials with thoughtful design. Its white synthetic filament bristles, hollow polyester filament brush head, silver ferrule, and medium size all contribute to its exceptional cleaning capabilities. Whether you need a Filament Bristle Scrubbing Brush for tough grime or a Synthetic Filament Cleaning Brush for everyday maintenance, this product offers the quality and performance you can trust.

Features:

- Product Name: Synthetic Filament Brush
- Bristle Material: Synthetic filament bristles for effective cleaning
- Type: Multi-purpose filament brush suitable for various scrubbing tasks
- Ferrule Type: Durable crimped ferrule ensuring bristle stability
- Ferrule Material: Lightweight and rust-resistant aluminum ferrule
- Ferrule Color: Sleek silver finish for a professional look
- Ideal as a Filament Bristle Scrubbing Brush for tough cleaning jobs
- Versatile Synthetic Filament Cleaning Brush designed for long-lasting use

Applications:

The OEM Synthetic Filament Brush is an essential tool designed for a wide range of application occasions and scenarios, making it a versatile choice for both professional and personal use. Originating from China, this Durable Synthetic Bristle Brush combines quality and affordability, with a price range of USD 0.50-5.00 per piece, making it accessible for bulk purchases with a minimum order quantity of 2000 pieces. Its supply ability of 2500 pieces per week ensures steady availability to meet various demands.

This Synthetic Filament Cleaning Brush is ideal for cleaning tasks that require precision and durability. The short bristle length and synthetic filament bristles are engineered to provide effective cleaning performance on delicate surfaces without causing damage. The crimped aluminum ferrule enhances the brush's durability and stability, ensuring that the bristles remain securely in place even during rigorous use. The natural-colored handle offers a comfortable grip, making it suitable for prolonged cleaning sessions.

In industrial settings, this Durable Synthetic Bristle Brush is perfect for cleaning machinery parts, electronic components, and intricate equipment where dust and debris can accumulate. Its synthetic filament bristles resist wear and tear, providing long-lasting performance in demanding environments. Additionally, the brush is widely used in automotive workshops for cleaning engine parts, filters, and other hard-to-reach areas, ensuring thorough maintenance and improved equipment longevity.

For household and commercial cleaning, the Synthetic Filament Cleaning Brush excels in scrubbing tiles, grout, kitchen appliances, and bathroom fixtures. Its short bristles can reach tight corners and crevices, offering a comprehensive cleaning solution that helps maintain hygiene and cleanliness. The aluminum ferrule and natural handle add to the brush's robustness, making it a reliable cleaning companion for daily chores.

Furthermore, artists and craftsmen can benefit from this brush as a tool for applying coatings, finishes, or cleaning delicate surfaces during their creative processes. The OEM Synthetic Filament Brush's versatility extends to various professions, including painting, woodworking, and laboratory work, where precise and durable cleaning tools are essential.

Packaged in standard export cartons, the brush is ready for international shipment with a delivery time of approximately 30 weeks, following payment terms of T/T. This ensures a smooth procurement process for businesses looking to source a high-quality, Durable Synthetic Bristle Brush in bulk. Overall, the OEM Synthetic Filament Brush is a reliable, versatile, and cost-effective solution for numerous application occasions and scenarios.

Customization:

Our OEM Synthetic Filament Cleaning Brush offers excellent customization services to meet your specific needs. Made in China, this Synthetic Fiber Brush Tool is crafted with high-quality synthetic filament bristles and comes with a handle made of either wood or plastic, ensuring durability and comfort during use.

We accept a minimum order quantity of 2000 pieces, with prices ranging from USD 0.50 to 5.00 per piece, depending on your customization requirements. Each brush features white bristles, ideal for various painting applications, making it a versatile Synthetic Fiber Brush Tool for professional and personal use.

Packaging is handled with standard export cartons to ensure safe delivery. With a supply ability of 2500 pieces per week and a delivery time of approximately 30 working days, we strive to meet your demand promptly. Payment terms are flexible with T/T accepted. Choose our Synthetic Filament Cleaning Brush for reliable performance and customizable options tailored to your painting and cleaning needs.
