- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

Product Specification

- Size: Medium
- Ferrule Type: Crimped
- Brush Head: Hollow Polyester Filament
- Bristle Color: White
- Material: Synthetic Filament
- Ferrule Color: Silver
- Handle Material: Wood/Plastic
- Handle Color: Natural
- Highlight: **durable synthetic bristle brush, wood handle cleaning brush, rigorous maintenance synthetic brush**

Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet a wide range of cleaning and scrubbing needs. Featuring a short bristle length, this brush offers precise control and efficient cleaning power, making it ideal for detailed scrubbing tasks where accuracy and thoroughness are essential. The bristles are made from hollow polyester filament, a synthetic material known for its durability, flexibility, and excellent resistance to wear and tear. This ensures that the brush maintains its effectiveness over time, even with frequent use on tough surfaces.

One of the standout features of this brush is its multi-purpose design. As a Multi-Purpose Filament Brush, it is suitable for a variety of applications across different industries and household uses. Whether you need to scrub kitchen counters, clean automotive parts, or tackle intricate crafts and DIY projects, this brush delivers consistent performance. The synthetic fiber scrubbing brush bristles are engineered to provide the right balance of stiffness and gentleness, allowing you to remove dirt, grime, and stains without damaging the surfaces being cleaned.

The ferrule of the brush is crimped, which enhances the overall durability and structural integrity of the tool. The crimped ferrule securely holds the bristles in place, preventing shedding and ensuring the brush maintains its shape even after prolonged use. This construction feature contributes to the brush's long lifespan and reliability, making it a cost-effective choice for both professional and personal use.

The handle of the Synthetic Filament Brush is available in both wood and plastic materials, providing options to suit different preferences and environments. The wooden handle offers a classic, sturdy grip that is comfortable to hold during extended cleaning sessions. It also adds an eco-friendly aspect to the product, appealing to users who prefer natural materials. On the other hand, the plastic handle option provides a lightweight and water-resistant alternative, ideal for wet conditions or environments where hygiene is a priority. Both handle types are ergonomically designed to reduce hand fatigue and enhance control, ensuring that users can work efficiently and comfortably. The brush head is constructed from hollow polyester filament, which is a key factor in its superior cleaning capability. Hollow filaments allow for better retention and release of cleaning agents, making the scrubbing process more effective. Additionally, the synthetic nature of the filament ensures resistance to chemicals, moisture, and mildew, which extends the brush's usability in various settings. This makes the Synthetic Filament Brush particularly well-suited as a Filament Bristle Scrubbing Brush for industrial, commercial, and household environments alike.

In summary, the Synthetic Filament Brush combines thoughtful design with high-quality materials to deliver a product that meets diverse cleaning challenges. Its short bristle length provides precision, the crimped ferrule guarantees durability, and the choice of wood or plastic handles offers comfort and versatility. The hollow polyester filament bristles ensure effective scrubbing power with longevity and resilience. Whether you are looking for a Multi-Purpose Filament Brush for everyday cleaning or a Synthetic Fiber Scrubbing Brush for more demanding tasks, this brush is an excellent choice that balances function, durability, and ease of use.

Investing in this brush means equipping yourself with a dependable cleaning tool that performs consistently across many surfaces and applications. Its synthetic filament bristle construction, combined with ergonomic design features, makes it a valuable addition to any cleaning arsenal. Experience the difference that a well-crafted Filament Bristle Scrubbing Brush can make in your cleaning routine with the Synthetic Filament Brush.

Features:

- Multi-Purpose Filament Brush designed for versatile use
- Durable crimped ferrule for secure bristle attachment
- High-quality synthetic bristles in white for effective cleaning
- Lightweight aluminum ferrule for enhanced durability
- Ideal as a Filament Bristle Scrubbing Brush for various surfaces
- Perfect multi-purpose filament brush suitable for different tasks
- Ergonomic brush design for comfortable handling

Applications:

The OEM Synthetic Filament Brush, originating from China, is a versatile and reliable tool designed to meet various painting and cleaning needs. With a short bristle length made from high-quality synthetic filament, this brush offers excellent durability and efficiency for a wide range of applications. Whether you are a professional painter or a DIY enthusiast, this Multi-Purpose Filament Brush is ideal for achieving smooth and precise finishes on different surfaces.

One of the main application occasions for this Synthetic Fiber Scrubbing Brush is in artistic and decorative painting projects. Its synthetic filament bristles provide consistent paint flow and excellent control, making it perfect for detailed work, touch-ups, and intricate designs. Additionally, the brush's silver ferrule color not only adds a sleek look but also ensures a secure hold on the bristles, enhancing the overall performance during use.

Beyond painting, the Filament Brush Cleaning Tool is an effective solution for scrubbing and cleaning various household and industrial surfaces. Its sturdy synthetic filaments can handle tough scrubbing tasks without damaging the surface, making it suitable for cleaning machinery, furniture, and even delicate items that require gentle yet effective cleaning. The short bristle length allows for better control and precision, especially when cleaning small or hard-to-reach areas.

The OEM Synthetic Filament Brush is supplied with a minimum order quantity of 2000 pieces, making it an excellent choice for bulk purchasers and businesses looking to maintain a steady supply. Packaged in standard export cartons, the brushes are protected during shipping, ensuring they arrive in perfect condition. With a supply ability of 2500 pieces per week and a delivery time of approximately 30 working days, this product is reliable for continuous demand.

Priced between USD 0.50 and 5.00 per piece, this brush offers great value for its quality and versatility. Payment terms are flexible, with T/T accepted to facilitate smooth transactions. Overall, the OEM Synthetic Filament Brush is a dependable, multi-purpose tool that excels in both painting and cleaning scenarios, making it an essential addition to any toolkit.
