### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Minimum Order Quantity: 2000Pcs
- Price: USD0.50-5.00/Pc
- Packaging Details: Standard Export Carton
- Delivery Time: 30wek days
- Payment Terms: T/T
- Supply Ability: 2500Pcs Per week

### Product Specification

- Ferrule Material: Aluminum
- Bristle Color: White
- Size: Medium
- Ferrule Type: Crimped
- Bristle Material: Synthetic
- Bristle Length: Short
- Ferrule Color: Silver
- Type: Brush
- Highlight: **short bristle synthetic filament brush, hollow polyester filament brush, industrial cleaning synthetic brush**

### Product Description:

The Synthetic Filament Brush is a versatile and reliable tool designed to meet the diverse needs of artists, craftsmen, and professionals who require precision and durability in their painting and cleaning tasks. Featuring a medium-sized brush head crafted from hollow polyester filament, this brush combines the strength and flexibility of synthetic fibers to deliver excellent performance across a wide range of applications.

At the core of this brush's design is its hollow polyester filament brush head. Unlike traditional natural bristles, the synthetic filaments are engineered to be resilient and long-lasting. The hollow structure of the filaments allows for superior paint retention and smooth application, making it an ideal choice for detailed painting projects as well as broader strokes. This innovative brush head material also offers enhanced resistance to wear and tear, ensuring that the brush maintains its shape and effectiveness over time, even with frequent use.

The handle of the Synthetic Filament Brush is finished in a natural color, providing an aesthetically pleasing and comfortable grip for extended use. The natural handle color not only adds a classic look but also makes it easy to spot and organize among other tools in your workspace. Ergonomically designed, the handle offers a balanced and secure hold, allowing for precise control during intricate painting or scrubbing tasks.

One of the key features of this brush is its crimped ferrule, which securely attaches the brush head to the handle. The crimped ferrule design enhances the durability and stability of the brush, preventing shedding of bristles and ensuring that the brush head stays firmly in place even under rigorous use. This construction detail contributes to the overall longevity and reliability of the brush, making it a trusted tool for both professional and hobbyist painters.

In terms of usage, this Synthetic Filament Brush excels as a painting tool, offering versatility for various surfaces and paint types.

Whether you are working with acrylics, oils, or watercolors, the synthetic fiber brush tool provides smooth and consistent coverage, allowing for both broad washes and fine details. Additionally, the brush's synthetic fiber composition makes it easy to clean, as it resists absorbing paint and dries quickly, facilitating efficient turnaround between painting sessions.

Beyond painting, this brush also functions effectively as a Synthetic Filament Cleaning Brush and a Synthetic Fiber Scrubbing Brush. The sturdy synthetic fibers can withstand scrubbing motions and are capable of dislodging dirt and debris from surfaces without damaging them. This makes the brush suitable for cleaning delicate items or preparing surfaces before painting or finishing. The versatility of the synthetic fibers means that the brush can be used across multiple tasks, reducing the need for multiple specialized tools.

Overall, the Synthetic Filament Brush is a medium-sized, natural-handle brush designed with a hollow polyester filament head and a crimped ferrule, making it an essential addition to any artist's toolkit or cleaning kit. Its synthetic fiber construction ensures durability, ease of maintenance, and adaptability for painting, cleaning, and scrubbing tasks. Whether you are an artist seeking a reliable brush for detailed work or someone in need of a robust synthetic fiber scrubbing brush for cleaning purposes, this brush offers exceptional quality and performance.

Investing in this Synthetic Filament Cleaning Brush means choosing a product that combines innovative materials with thoughtful design to deliver superior results. Its synthetic fiber brush tool capabilities, coupled with the practical advantages of synthetic fiber scrubbing brush functionality, make it a multi-purpose asset that stands out in both artistic and practical contexts. Experience the difference with a brush that is engineered to meet the demands of modern painting and cleaning applications, all while providing comfort, control, and long-lasting durability.

### Features:

- Durable Synthetic Bristle Brush designed for long-lasting use
- Multi-Purpose Filament Brush suitable for various painting tasks
- Filament Bristle Scrubbing Brush with a hollow polyester filament brush head
- Crimped ferrule type for secure bristle attachment
- Lightweight aluminum ferrule material for enhanced durability
- Short bristle length ideal for precise painting and scrubbing

### Applications:

The OEM Synthetic Filament Brush is an exceptionally versatile cleaning tool designed to meet various application occasions and scenarios. Crafted with high-quality synthetic filament bristles, this Filament Bristle Scrubbing Brush offers durability and effective cleaning performance for both domestic and industrial uses. Originating from China, this brush is manufactured under strict quality control standards, ensuring consistent product excellence. With a medium size and a natural-colored handle, it provides a comfortable grip for extended use, making it ideal for scrubbing tasks that require precision and strength.

In household environments, the Synthetic Fiber Brush Tool is perfect for tackling tough stains on kitchen surfaces, bathroom tiles, and outdoor furniture. Its synthetic filament bristles are engineered to resist wear and tear while providing gentle yet thorough scrubbing action, making it safe to use on a variety of surfaces without causing damage. The aluminum ferrule, crimped securely to the handle, ensures the bristles stay firmly in place during rigorous cleaning sessions. Whether you need to clean grout lines, remove dirt from carpets, or maintain the cleanliness of your garden tools, this Filament Brush Cleaning Tool stands out as a reliable choice.

Commercially, the OEM Synthetic Filament Brush is widely used in restaurants, hotels, and cleaning service companies where hygiene and efficiency are paramount. Its robust design and synthetic fibers enable quick removal of grease, grime, and other stubborn residues from kitchen equipment, floors, and walls. With a supply ability of 2500 pieces per week and a minimum order quantity of 2000 pieces, businesses can easily procure this cost-effective brush at competitive prices ranging from USD 0.50 to 5.00 per piece. The packaging details include standard export cartons, ensuring safe and efficient delivery within approximately 30 weeks, with payment terms handled via T/T.

Moreover, this Synthetic Filament Brush is suitable for use in automotive cleaning, workshops, and even art studios where precise scrubbing or detailing is required. Its synthetic filament bristles offer excellent resistance to chemicals and solvents, making it a practical choice for diverse cleaning scenarios. Whether you are a professional cleaner, a DIY enthusiast, or a business owner looking for a dependable Filament Bristle Scrubbing Brush, this product from OEM guarantees quality, durability, and efficiency in every use.

## Customization:

Our OEM Synthetic Filament Brush offers exceptional customization services to meet your specific needs. Manufactured in China, this Durable Synthetic Bristle Brush features a hollow polyester filament brush head that ensures effective cleaning performance. The handle is available in natural color, made from either wood or plastic, complemented by a silver aluminum ferrule for enhanced durability and aesthetics.

We cater to orders with a minimum quantity of 2000 pieces, priced competitively between USD 0.50 and 5.00 per piece. Each Synthetic Filament Cleaning Brush is carefully packaged in standard export cartons to ensure safe delivery. With a supply ability of 2500 pieces per week and a delivery time of approximately 30 working days, we are well-equipped to fulfill your bulk orders efficiently.

Our payment terms are flexible, primarily accepting T/T transactions, making the purchasing process smooth and reliable. Whether you require a Synthetic Fiber Scrubbing Brush for industrial or commercial use, our product customization services guarantee a high-quality, durable solution tailored to your specifications.
